Technology

Rosemary Matty led a ribbon-cutting to commemorate the \$3.6 million investment project to modernize and expand the capabilities of the nation's largest military aircraft engine ground test facility, located at the Arnold Engineering Development Complex near Tullahoma, Tenn. The new C1 and C2 cell cooling system was based on successful design of AEDC's existing J1 and J2 test cell cooling system. Retrofitting the system resulted in lower operating costs and satisfied capability requirements for a broader range of simulated flight conditions without sacrificing data quality.
